

**IN THE CLAIMS**

**This listing of the claims replaces all prior versions of the claims in the application.**

1-9 (Cancelled)

10. (Previously Presented) An isolated antibody which specifically binds to a polypeptide selected from the group consisting of:

- a) a polypeptide comprising the amino acid sequence of SEQ ID NO:1, and
- b) a polypeptide comprising a naturally occurring amino acid sequence at least 90% identical to the amino acid sequence of SEQ ID NO:1.

11-28 (Cancelled)

29. (Withdrawn) A diagnostic test for a condition or disease associated with the expression of CJPDZ in a biological sample comprising the steps of:

- a) combining the biological sample with an antibody of claim 10, under conditions suitable for the antibody to bind the polypeptide and form an antibody:polypeptide complex; and
- b) detecting the complex, wherein the presence of the complex correlates with the presence of the polypeptide in the biological sample.

30. (Previously Presented) The antibody of claim 10, wherein the antibody is:

- a) a chimeric antibody,
- b) a single chain antibody,
- c) a Fab fragment,
- d) a F(ab')<sub>2</sub> fragment, or
- e) a humanized antibody.

31. (Original) A composition comprising an antibody of claim 10 and an acceptable excipient.

32. (Withdrawn) A method of diagnosing a condition or disease associated with the expression of CJPDZ in a subject, comprising administering to said subject an effective amount of the composition of claim 31.

33. (Original) A composition of claim 31, wherein the antibody is labeled.

34. (Withdrawn) A method of diagnosing a condition or disease associated with the expression of CJPDZ in a subject, comprising administering to said subject an effective amount of the composition of claim 33.

35. (Original) A method of preparing a polyclonal antibody with the specificity of the antibody of claim 10 comprising:

- a) immunizing an animal with a polypeptide having an amino acid sequence of SEQ ID NO:1, or an immunogenic fragment thereof, under conditions to elicit an antibody response;
- b) isolating antibodies from said animal; and
- c) screening the isolated antibodies with the polypeptide, thereby identifying a polyclonal antibody which binds specifically to a polypeptide having an amino acid sequence of SEQ ID NO:1.

36. (Original) An antibody produced by a method of claim 35.

37. (Original) A composition comprising the antibody of claim 36 and a suitable carrier.

38. (Original) A method of making a monoclonal antibody with the specificity of the antibody of claim 10 comprising:

- a) immunizing an animal with a polypeptide having an amino acid sequence of SEQ ID NO:1, or an immunogenic fragment thereof, under conditions to elicit an antibody response;
- b) isolating antibody producing cells from the animal;
- c) fusing the antibody producing cells with immortalized cells to form monoclonal antibody-producing hybridoma cells;
- d) culturing the hybridoma cells; and
- e) isolating from the culture monoclonal antibody which binds specifically to a polypeptide having an amino acid sequence of SEQ ID NO:1.

39. (Original) A monoclonal antibody produced by a method of claim 38.

40. (Original) A composition comprising the antibody of claim 39 and a suitable carrier.

41. (Original) The antibody of claim 10, wherein the antibody is produced by screening a Fab expression library.

42. (Original) The antibody of claim 10, wherein the antibody is produced by screening a recombinant immunoglobulin library.

43. (Withdrawn) A method for detecting a polypeptide having an amino acid sequence of SEQ ID NO:1 in a sample, comprising the steps of:

- a) incubating the antibody of claim 10 with a sample under conditions to allow specific binding of the antibody and the polypeptide; and
- b) detecting specific binding, wherein specific binding indicates the presence of a polypeptide having an amino acid sequence of SEQ ID NO:1 in the sample.

44. (Withdrawn) A method of purifying a polypeptide having an amino acid sequence of SEQ ID NO:1 from a sample, the method comprising:

- a) incubating the antibody of claim 10 with a sample under conditions to allow specific binding of the antibody and the polypeptide; and
- b) separating the antibody from the sample and obtaining the purified polypeptide having an amino acid sequence of SEQ ID NO:1.

45. (Previously Presented) An isolated antibody of claim 10 which specifically binds to a polypeptide comprising the amino acid sequence of SEQ ID NO:1.

46. (Previously Presented) An isolated antibody of claim 10 which specifically binds to a polypeptide comprising a naturally occurring amino acid sequence at least 90% identical to the amino acid sequence of SEQ ID NO:1.
